***HERCULEAN –**

Write some step-by-step instructions for ordering decimals to 3 places. Once you written them, test them out to see if they work!

Thursday Answers

1. First look at the whole numbers. The smallest whole numbers should go first.
2. Next, look at the tenths (first number after the decimal point). The smallest tenths go next.
3. After that, look at the hundredths (Second number after the decimal point). The smallest hundredths should go next.
4. Finally, look at the thousandths (third digit after the decimal point). The smallest digits go next.
