A Timeline of the Stone Age

A task setting PowerPoint about events in the Stone Age

LO: to look at the chronology of events in the Stone Age

What does chronology mean?

Chronology: the arrangement of events or dates in the order of their occurrence.

Can you put these events into
chronological order?

Romans
invade
Britain

Usain Bolt
wins 100m
gold at the
Olympics

Dinosaurs
lived on
earth

Queen
Elizabeth II
is born

Can you put these events into
chronological order?

Answer

Dinosaurs
lived on
earth

Romans
invade
Britain

Queen
Elizabeth II
is born

Usain Bolt
wins 100m
gold at the
Olympics

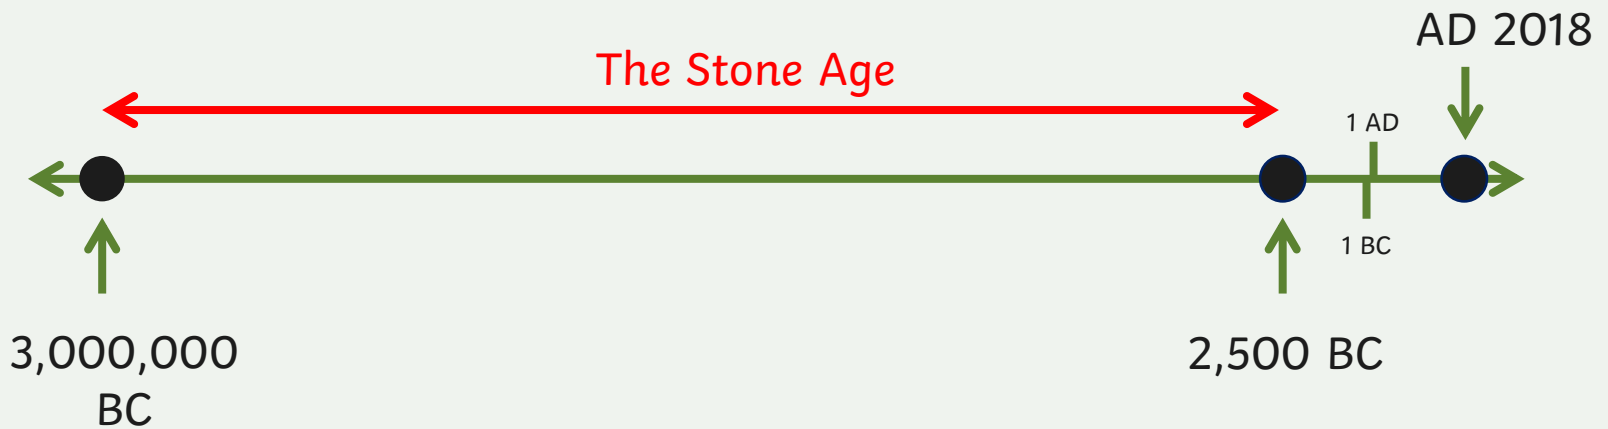

The earth is around 4,500,000,000 (4.5 billion) years old. We can't possibly know exactly how old, so we wouldn't know when to start counting from.

The system we use has no zero. It works forwards from 1AD (AD) and backwards from 1BC (BC).

BC stands for 'Before Christ' and AD stands for 'Anno Domini' (the year of the lord). Some people use BCE and CE instead of AD and BC.

It's hard to get your head round, but our written history in Britain began only a tiny blip in time ago, courtesy of the Romans in AD43!

(Not to scale!)

Which event do you think came first?

Can you put them into **chronological** order?

No more woolly mammoths in Britain.
This was possibly due to grassland turning into forest with the changing climate.

Great sheets of ice cover Britain and food is scarce.
Early humans are forced to leave for warmer countries.

The first members of the Homo genus inhabit Britain.

Which event do you think came first?

Can you put them into **chronological** order?

Answer

The first members of the Homo genus inhabit Britain.

No more woolly mammoths in Britain.
This was possibly due to grassland turning into forest with the changing climate.

Great sheets of ice cover Britain and food is scarce.
Early humans are forced to leave for warmer countries.

When do you think these events happened?

800,000 BC

The first members
of the Homo
genus inhabit
Britain.

200,000 BC

Great sheets of
ice cover Britain
and food is
scarce. Early
humans are
forced to leave for
warmer
countries.

12,000 BC

No more woolly
mammoths in
Britain.
This was possibly
due to grassland
turning into
forest with the
changing climate.

Look at the cards in your pack.
Can you put them into **chronological** order?
