

Comparing Quadrilaterals

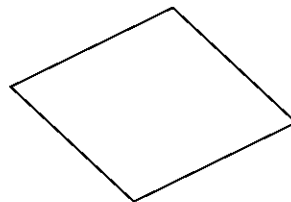

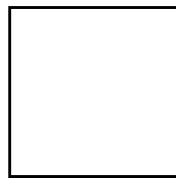

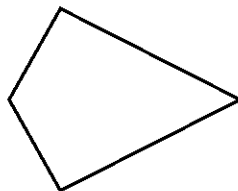

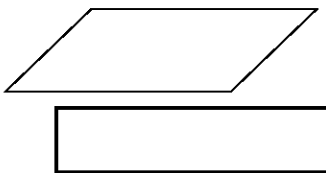

I know the name and properties of different types of quadrilaterals.

Sort the quadrilaterals into the correct box. Then name and write a mathematical fact for each quadrilateral.

	Line of Symmetry	No Line of Symmetry
A Right Angle		
No Right Angle		

Quadrilaterals

Word Bank

square

rectangle

parallelogram

rhombus

trapezium

kite

parallel

equal

acute

obtuse

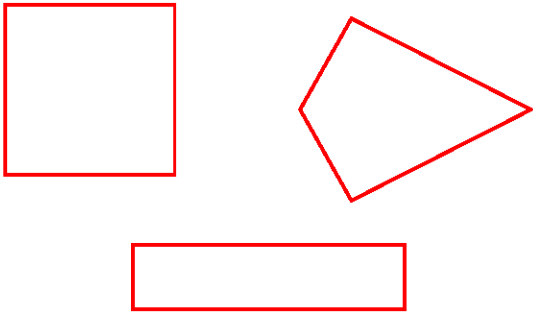

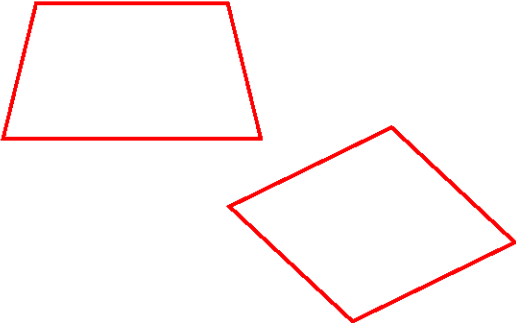

line of symmetry
